PROFESSIONAL SUMMARY

Experienced Healthcare Data and Interface Analyst with over 10 years of expertise in clinical systems integration, data transformation, and business intelligence reporting. Skilled in bridging the gap between healthcare operations and technical teams by translating complex data requirements into actionable solutions. Proficient in HL7 and FHIR standards, SQL-based data validation, and real-time interface configuration across platforms such as Epic, Meditech, and Mirth. Strong background in Agile environments, with experience supporting SDLC activities including sprint planning, stakeholder engagement, and QA coordination. Currently developing a data portfolio focused on Medicare cost and utilization trends using Tableau and CMS open data. Known for driving cross-functional collaboration and delivering insights that support quality improvement and regulatory compliance.

CORE COMPETENCIES AND TECHNICAL SKILLS

- **EHR Systems:** Epic, Meditech, VistA, Mirth Connect, Cloverleaf
- **Data Standards:** HL7, FHIR, JSON, X12 (working knowledge)
- **Tools and Languages:** SQL, Tableau, Python, JavaScript, SAS (basic), Mirth
- **Specialties:** Interface configuration, workflow optimization, go-live support, user training
- **SDLC & Methodologies:** Agile, sprint planning, QA testing, documentation, cross-functional collaboration

PROFESSIONAL EXPERIENCE

Data and Interface Analyst

Abbott | March 2022 to April 2025

- Led modular HL7 interface upgrades and EHR integrations as project lead, supporting cross-functional teams with planning, stakeholder coordination, and technical execution.
- Supported multiple EHR go-lives via RALS middleware, configuring HL7 message routing and validating interoperability with Cerner, Epic Beaker, Meditech, Soft, and VistA.
- Collaborated with clinical staff and IT to align diagnostic workflows across systems, ensuring accurate and timely data transmission for lab results and patient management.

- Developed and refined data mapping strategies to improve accuracy across LIS-to-EHR connections; conducted validation and troubleshooting during go-live and post-production support.
- Created job aids and onboarding materials to translate interface logic and workflows into accessible language for non-technical clinical users and stakeholders.
- Participated in Agile SDLC: contributed to sprint planning, testing, and implementation support for both new builds and system upgrades.

Supervisor, Women's Clinics

UVA Health | 2018 to 2021

- Led clinic operations across multiple sites, optimizing scheduling workflows and improving telehealth access.
- Analyzed data using SQL and Python to identify and correct scheduling inefficiencies, reducing patient wait times.
- Presented operational KPIs to executive leadership and directed staff training on new scheduling protocols.
- Contributed to EHR configuration updates and served as a liaison between clinical staff and IT teams.

Data Analyst

UVA Health System | 2012 to 2018

- Supported the transition from a legacy scheduling platform to Epic Cadence, assisting in data migration and provider template setup.
- Validated Epic FHIR/HL7 messages and REST APIs, ensuring adherence to standards and clinical data accuracy.
- Created interactive reports and dashboards to monitor provider utilization, appointment volumes, and operational trends.
- Conducted root-cause analysis of scheduling bottlenecks and no-show rates to drive performance improvement initiatives.
- Participated in system testing and validation to ensure EHR modules met clinical workflow needs.

Graphic Designer

U.S. Army JAG School | 2010 to 2012

- Developed training materials, presentations, and infographics to support legal education for military attorneys.
- Applied user-centered design principles to instructional materials, ensuring accessibility and clarity for diverse audiences.

EDUCATION

Wayne State University, Detroit, MI

Bachelor of Fine Arts in Information Design and Visual Communication

Applied experience equivalent to coursework in data visualization, healthcare analytics, and clinical documentation systems.
